## WORK EXPERIENCE

### Senior Shopify Developer
Elva

*11/2023 - Present*

*Achievements/Tasks*

- Work with Figma files from designers to create, update, and maintain Shopify sites.
- Review and approve GitHub pull requests.
- Onboarding new developers to projects.
- Worked with project manager to create the "perfect" JIRA ticket.

### Senior Web Developer
Sweden Unlimited

*09/2022 - 11/2023*

*Achievements/Tasks*

- I took designs from Figma and spun them into fully functional Shopify sites.
- Wrote acceptance criteria for client work tickets.
- I reviewed and approved GitHub pull requests.
- Created an interactive interface that allows the client to place absolutely positioned elements on an informational Shopify section.
- Created an interactive legend that allows the client to identify and determine which Shopify section a CTA will scroll to.

### Tech Lead
Tomorrow Agency

*09/2021 - 09/2022*

*Achievements/Tasks*

- I oversaw developers for several clients, reviewing and approving code pull requests, and implementing major and minor theme releases.
- I ran weekly meetings to plan for sprints, and mid week check-ins to shepherd progress as needed.
- Created, maintained, and updated client Shopify sites as part of a team, writing Liquid templates and sections, and implementing CSS structure (mixins, SCSS directories).

# WORK EXPERIENCE

### Senior Web Developer
First+ Third

*09/2020 - 09/2021*

*Achievements/Tasks*

- Took designs from Sketch/Abstract and made them into semantic HTML/CSS/JS that was reusable, scalable, performant, accessible and worked on all major browsers. (HTML, SCSS, Nunjucks, JavaScript).
- Maintained and updated client sites for non-profit organizations.

### Senior Web Developer
AddEvent/AppointmentThing

*02/2020 - 07/2020*

*Achievements/Tasks*

- Provided front-end code and UI design for site pages.
- Built an onboarding process for new customers, and implemented a search engine for the site's Help section.
- Teamed up with the back-end developer to streamline and improve code for the appointment-making process.

### Front End Web Developer
Forty-Four Digital

*01/2016 - 11/2019*

*Achievements/Tasks*

- I worked as part of the development team to design and implement solutions for clients of all stripes. Magento, Drupal, Shopify, WordPress, HTML5 , CSS / SCSS, Javascript / jQuery.
- Built and updated Magento 1 and 2 pages for Cokestore.com and Coke France.
- Started an initiative "By Our Powers Combined" to foster communication between development and design teams.

### Front-End Web Developer
Tin Roof Software

*12/2014 - 12/2015*

*Achievements/Tasks*

- Provided the front-end code for an interface for CNN Go for DirecTV's set- top box (Angular, HTML, CSS).
- Ported the CNN Go interface to the Amazon Fire Stick and Roku.
- Helped build CNN's Great Big Story site (React).

### Full CV
Available at https://kyds3k.com

*08/1999 - Present*

# EDUCATION

### Bachelor of Science, Technical Writing
Carnegie Mellon University

*1992 - 1996*

# PERSONAL PROJECTS

TwitchTrains.com (06/2021 - Present)
- Built a site that takes data from a Google Spreadsheet template and presents a schedule for Twitch raid trains, converted to the viewer's time zone, with a link to the currently playing DJ. HTML/Javascript

# PERSONAL PROJECTS

### Currently Playing/Artist Bio info for Twitch (01/2020 - Present)
- Wrote a locally-running website that displays the current artist and song that I'm playing on Twitch, and the artist's bio from Spotify. Uses Supabase, Firebase, and the Spotify API, and grabs the song info from VirtualDJ as I'm playing. HTML/Javascript

### Nerd Trivia Online (02/2020 - Present)
- Online version of a Nerd Trivia night that I ran in Atlanta for close to a decade. Labor of love, work in progress, all of the above. Written in NextJS.

### Movie Game (02/2020 - Present)
- Companion to the Nerd Trivia Online - grabs a mashed-up movie synopsis from a JSON file and presents it for the player to guess. Grabs movie posters from TheMovieDB.
